

The Embassy of Peru is delighted to present "Sense International", an organisation dedicated to support people with deafblindness and their families around the world, including Peru.

Sense International show us that, with the right support, people with deafblindness can communicate, access to quality education and healthcare, become independent and find a job. Rather than being excluded, they can thrive and live life to their full potential.

We would like to encourage everyone to learn more about Sense International, as well as to support this important work in any way you can.
